

Instructors Needed

Mid-Coast Chapter Members are needed to teach classes or lead field trips at the Academy of Lifelong Learning, Victoria.

Our chapter began providing classes and field trips in the fall of 2016 and the response from the attendees has been

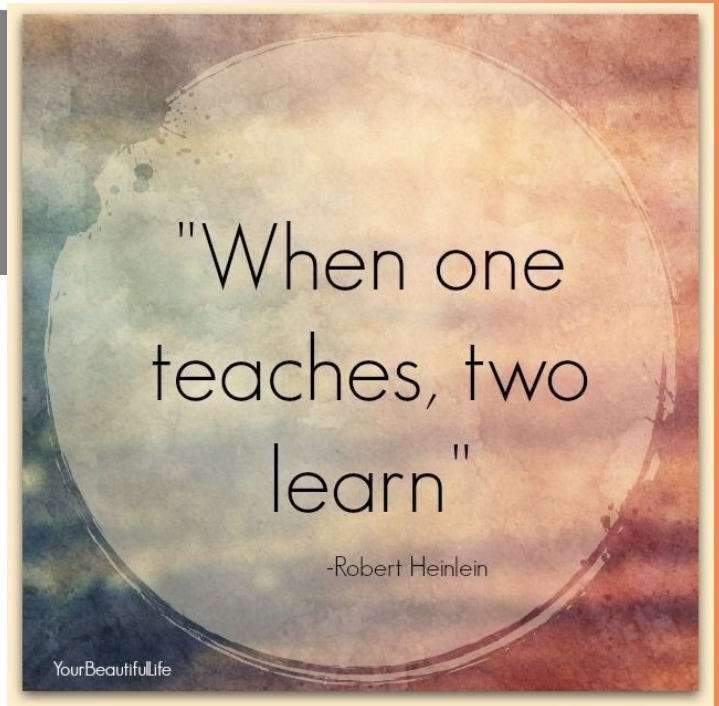

great. They want more of whatever we want to teach. We've provided classes on Whooping Cranes, Seashells, Alligators, Birding, Native Plant Gardening, Nature Journaling, Bay Ecology and much more. They are asking for more information about nature, especially our local environment.

Most classes and field trips are attended by 10—20 adults who's hobby it is to learn. They ask stimulating questions and are happy with whatever we provide. We like to have the classes on "TMN Tuesdays", the second and fourth Tuesdays, but if you'd rather offer one on a different day, that's perfectly fine. The best way to learn, is to teach. Join us! [Check out the current schedule](#)

Deadline for the spring catalog is June 22.
